

Wiring Up

HTML, CSS and JS like to play together

Stuff covered

- `querySelector`, `querySelectorAll`
- Passing `this`
- Showing and hiding stuff
- Adding and removing classes
- Handling events: clicks, `mouseenter`, `mouseleave`, `keyup`
- Passing and using the `event`

Guidance

- Start with the wiring-up starter project
- Copy the project into your dropbox dedicated folder under Day9
- Review the starter project
- Follow the steps described below
- Important – every project you receive during the bootcamp will have a name, those projects should be submitted at the following structure:
Your Folder \ DayX \ proj-name

Try stuff

1. 3 seconds after the page loads:
 - a. Change the heading text to "I Love JS"
2. Marking - when Mark button is clicked, call the function `onMark()`
 - a. Use a global variable `glIsMark` to keep the current state
 - b. Use `querySelectorAll` to find all spans inside the class name 'box' and add / remove a mark class to them
 - c. Change the text of the button to Unmark / Mark
Tip: pass `this` as an argument from the HTML so you will have easy access to the button
 - d. When a marked word is clicked, use a function to show that word in the `<span>` inside the `<h2>`
(*'Its so...'*)
3. The modal
 - a. When **Bless** is clicked:
 - i. Update the content of the modal to "You were blessed at *current-time*" and show it (see the image below as an example)
 - ii. Use the `getRandomColor` function and change the style of the `<h2>`
 - b. This modal should close automatically after 5 seconds
 - c. When the mouse enters the image change it to `ca.png` and when the mouse leaves it – restore the first image.

- d. When the image is clicked, show the modal
(it will also close automatically after 5 seconds)
- e. Also close the modal when it's close button is clicked
- f. Close the modal when ESC is pressed

I Love JS

You were blessed at 00:10:16

its so... easy

Do the **difficult** things while they are **easy** and do the great things while they are small. A journey of a thousand miles must begin with a single step.

Un Mark

Bless
